## MARY COHR METHOD

Mary Cohr is the brightest star in the galaxy of beauty. Her journey began over 25 years ago, when the scientific knowledge of Jean-Daniel Mondin, doctor of pharmacology, met the skill and experience of Mary Cohr, well-known aesthetician and deputy chairwoman of the Beauty Salons Council. AROMATHERAPY, the event of the years 2000, led the entire sector to the discovery of a new world. Thanks to research, Mary Cohr made the use of the most active part of plants, essential oils, possible and opened new horizons to beauty. The Mary Cohr research laboratories, as a matter of fact, were the first in the world to provide essential oils in gel form, in order to make their application easier, increase penetration and enhance absorption of treatment creams applied thereafter. Mary Cohr constantly develops new beauty formulas and enables both aestheticians and clients to benefit from the very latest in the field of beauty treatments. In addition, safe products are essential

to Mary Cohr; that's why her laboratories select non-GMO active ingredients and carry out no testing on animals. Skin is a precious, wonderful yet fragile interface between the biological being and the natural environment (vegetal world), that has become unclean due to lack of care and protection.

## THE ISHI METHOD

The ISHI Method is the exclusive working method of Gruppo Dafla and revolves around an ISHI THE ELEMENTS original cosmetic line and associated treatment solutions.

ISHI THE ELEMENTS is an exclusive line of products and active ingredients, harmoniously combined with original instruments and fascinating treatment methods: from seaweed to essential oils, from minerals to thermal mud, from flowers to entire plants, and the beneficial effects of vine fruits and products. A great deal of active ingredients for extraordinarily intense treatments.

WINE From the many grapevine products, a great variety of Active Ingredients are used to provide original, exciting and highly modern treatments, deriving from the centuries-old, Mediterranean tradition in grapevine growing and in the use of grapes and wine for Beauty and Wellbeing.

CHOCOLATE From the secrets of the Mayan tradition to the most advanced researches of modern cosmetology in a crescendo of original and exciting synergies: the very sensual Chocolate, bitter or sweet, milk or plain chocolate, white or Gianduja chocolate, expresses its richness in mineral salts and vitamins, polyphenols, antioxidants and antiradicals, in addition to stimulating, energizing, reducing and detoxicating elements.
